NEW DELHI
21 April 2015

BEFORE THE NATIONAL GREEN TRIBUNAL

PRINCIPAL BENCH, NEW DELHI

Original Application No.199 of 2014

Almitra H. Patel and others

V/s

Union of India and others

Affidavit on behalf of Respondent Urban Development Department,

State Of Maharashtra

I, Smt. Seema P. Dhamdhere, Joint Secretary, Urban Development
Department, Government of Maharashtra, Mumbai 400032, do hereby state on
solemn affirmation that I have been authorised to file this affidavit before this
Hon'ble Tribunal in the aforesaid matter in pursuance to the orders passed by
this Hon'ble Tribunal on dated 20th March, 2015.

(S)

2. I say and submit that in pursuance with order dated 25th November, 2014 of this Hon'ble Tribunal in the case of Capt. Mall Singh and & others V/s Punjab PCB & others in appeal No. 70 of 2012 the following action is being taken by the State.

a) The State has already initiated activity related to cluster approach earlier.

On the basis of the status of the Urban Local Bodies (ULBs) with regard to Municipal Solid Waste the State has prepared a tentative list of cluster approach, the list of proposed clusters and a map showing this proposed cluster is annexed hereto for adopting the cluster methodology. However this would further require consultative viability study and approval of the state Government. The list of cluster and map is enclosed and collectively marked as Annexure-I.

I say & submit that the suggestions made by the Central Pollution Control Board (CPCB) in its draft "Action plan for management of Municipal Solid Waste" is also being taken into consideration while forming the clusters.

3. I say and submit that the following points / factors have been taken into account for formation of the clusters:-

- 1) Distance for transporting the waste between ULB's should not be more than 40 km.
- 2) Presently the distance between the ULBs is mapped based on www.maps.google.com.
- 3) Waste generation @ 400 grams per day per person
- 4) Census 2011 Population figures have been considered for assessment of waste quantity.
- 5) These clusters are based on distances and quantum of aggregated waste, however the project feasibility (Technical + Financial) will be worked out.

4. I further say that in pursuance to the Hon'ble Tribunal orders, the State has also taken the following initiatives:-

- a) The State is in the process of appointing a consultant for the process of identifying clusters, methodology, capacity building of ULBs, tendering process etc.
 - b) Further each ULB will be drafting a specific 'City Action Plan for Management of MSW' which would be in accordance with the directives of this Hon'ble Tribunal and would also meet the provisions of the Municipal Solid Waste (Management and Handling) Rules, 2000. The same would also include the suggestions made by the CPCB in its Draft National Action Plan for Management of MSW.
 - c) I further say and submit that this Respondent is also in the process of appointing a 'Nodal Agency' which would assist in drafting the "State Action Plan" for management of MSW. The Ministry of Urban Development, Government of India has empanelled experts for guiding the ULBs and the States for preparing their MSW Plan. The 'State Action Plan' for MSW would further advice the Urban Local Bodies in setting up individual / combined waste processing / disposal facilities on Regional / cluster based approach as per requirement. etc.
 - d) Awareness Programmes:- The State will be appointing IEC experts for taking up Sensitization programs and intensifying people's participation in the programs.
 - e) Encouragement to private sectors:- Public Private Partnership (PPP) projects on Solid Waste Management (SWM) are also being encouraged.
5. I say and submit that in accordance with the directives of this Hon'ble Tribunal, Status Report of all the ULBs for the MSW sector is enclosed herewith and marked as Annexure-II. It is submitted that the ULBs are regularly required to provide funds for the MSW Management in the ULB Budget. The present SWM situation in the State is submitted below for kind perusal:

Summary of Municipal Solid Waste Information from all Municipal Corporations and Municipal Councils in Maharashtra															
ULBs	No. of ULBs	Information Received from ULBs	No. of ULBs possessing its own land for SWM processing		MPCB has given Authorization to such land		Whether this land is in disputes/ there is opposition by the people		Whether garbage is transferred in covered vehicle manners		Segregation (Dry & Wet)		Daily Treatment	Biogas Plant	Sanitary land fill site
			YES	NO	YES	NO	YES	NO	YES	NO	YES	>50%	YES	YES	YES
Municipal Corporations	26	15	13	2	12	3	9	6	15	0	11	4	3	3	5
Municipal Councils	238	234* 88%	207	27	179	55	34	200	191	43	121	42	10	14	71
Total	264	249	220	29	191	58	43	206	206	43	132	46	13	17	76

Note-Remaining Municipal Councils viz. Satara, Devlali, Wadi, Rajgurunagar & Gadchandur are newly formed

6. I further say and submit that this Hon'ble Tribunal in its order dated 20/3/2015 at paras 19, 20 & 21 has directed the State Governments and the urban local bodies as follows:

"We direct the State Governments, Municipal Corporations, Councils and Committees to place dustbins of appropriate sizes in the Jhuggies/colonies and would also educate residents living in the Jhuggies/colonies about the need for waste segregation and mode of waste collection and transportation.

We leave upon the State Authorities to consider establishment of bio-gas plants based on anaerobic composting in the areas they consider proper.

We direct the State Governments, Corporations, Councils and Committees to involve the rag pickers, whether organised or not, by framing a policy in that behalf which would prevent individual rag pickers from rag picking and further strictly subject to a total prohibition on child workers being involved in such activities. Rag pickers, who are included under the policy, shall insure that sale of recyclable MSW is only to the people who are authorized."

In accordance with the aforesaid I say and submit that dust bins of appropriate sizes have since long time been made available by the ULBs in the colonies for collection of waste material. As submitted above presently 206 ULBs are collecting and transporting waste in covered vehicles. I say and submit that a total of 17 ULBs in the State have a Bio-gas plant in their area.

I further say and submit that involving rag pickers is already a part of the Solid Waste Management Collection process in the ULBs of the State. The Pune

Municipal Corporation in the State has made a success by involving the rag pickers. However as directed by this Hon'ble Tribunal the State will frame a policy for involvement of rag pickers to prevent individual rag pickers from rag picking and further strictly prohibiting involvement of child workers.

7. I further say & submit that the Status Report of Management of MSW in the ULBs shows, that efforts are being made to convert the collected MSW into an environment friendly beneficial end product. A few ULBs have developed Vermiculture Centers, & the fertilizer / manure thus derived is being utilized in the ULBs area; a few ULBs have already started the waste to energy plants also.

8. The best practices observed in few ULBs of the State in the implementation of the management of the Municipal Solid Waste (Management and Handling) Rules, 2000 is submitted below for kind perusal:

(A) **Kalyan Dombivli Municipal Corporation (KDMC):**

, 4/4/1 kg/cap

KDMC spread over 67 sq kms, with 12.46 lakh population, generates 550 metric tons of garbage daily. KDMC has launched a Mobile App which can be used by citizens to identify garbage in any area of the city click its real time picture and post the same on the said App. The same is cleared by the Corporation within 24 hours. Once citizens post real time pictures of the garbage, the location and the time at which the picture has been taken also gets recorded. The system administrator of this app notes the same and forwards it to the Sanitary Inspectors, who coordinate and carry out the clean up immediately. The report of the same is posted on the app as a feedback mechanism. This innovative mechanism has generated positive response from the citizens.

(B) **Chiplun Municipal Council, Dist. Ratnagiri:**

Chiplun became the first Dustbin Free Town in Maharashtra. It was accomplished by removing all dustbins in the town area. Collection of segregated waste at stipulated time, control over plastic waste, empowering rag

pickers, separate processing of biomedical waste has also been achieved. The council has started *Nisargrun* Biogas Electricity Project of 5 tonne capacity.

(C) Dapoli Nagar Panchayat, Dist. Ratnagiri.

Dapoli Nagar Panchayat is successfully running a plant generating electricity from Municipal Solid Waste.

(D) Navi Mumbai Municipal Corporation :

Navi Mumbai Municipal Corporation's Population is 11.19 Lakhs. The Corporation has installed a processing plant of 750 mt capacity on PPP basis. 100% MSW being treated daily and converted into compost and fuel pallets. Since processing plant has been installed on PPP basis the corporation incurs no expenditure for the disposal of MSW. *No tipping fee?*

(E) As far as bio-degradable municipal solid waste like foods, vegetables etc. is concerned, the Nisarg Run Technology of Dr. Sharad Kale, Bhabha Atomic Research Centre is being adopted by the ULBs wherever possible. ULBs take up Eco Friendly Technologies like Composting and Bio-Reactor technologies wherever possible. Municipal Corporation of Greater Mumbai has awarded projects using Eco Friendly Technologies. MCGM is also considering setting up of waste to energy projects wherein minimum land uses and technology generating minimum foul Odour/Green house gases will be used. The Pune Municipal Corporation is also considering capping of existing dumped sites for removal of Methane emissions at waste to energy projects. The state of Maharashtra has already initiated efforts to adopt cluster MSW integrated management facility at Taloja dist. Raigad for Mumbai Metropolitan Region through MMRDA. I say & submit that the State has taken up a total of 4 projects of SWM under the Government of India sponsored JnNURM, UIG component at a total project cost of Rs. 356.62 crores. Out of which 2 are already completed. Further under the State sponsored Maharashtra SuvarnaJayanti Nagrotthan Mahabhiyan implemented for upgrading & creating infrastructure facilities in the ULBs, this Respondent has sanctioned a project for ULBs at a

total cost of Rs.44 crores. The State has further issued strict instructions to the ULBs that funds made available under the 12th& 13th Finance Commission should be utilized for SWM activities on a priority basis.

9. I would like to submit that this Respondent State Urban Development Department is seized with issues relating to Solid Waste Management (SWM) and the following steps have already been initiated in this regard:

- a) The State has already adopted the Municipal Solid Waste Management (Management & Handling) Rules, 2000 of the GOI and accordingly specific instructions have been issued to all the ULBs in the State for strict compliance of the said rules in its true spirit.
- b) Regular review is being taken at the State level. A Solid Waste Management Cell has been established at the State level in 2002 to monitor the activities and also assist the ULBs in this regard.
- c) The State Government through its Water Supply & Sanitation Department has issued directions in respect of approval of sites for secured landfill and a committee has been constituted in each District under the Chairmanship of District Collector having Members of concerned Government Departments like Air Base Authority, MPCB, GSDA etc. to consider approval of sites identified by the Local Bodies from the point of view of specifications to be approved as per the Municipal Solid Waste Management (Management & Handling) Rules, 2000.
- d) Further for secured landfill sites preferably Stone Quarries and other barren land are being identified by the ULBs wherever possible.
- e) Further Eco friendly Technologies like Composting and Bio-Reactor technologies are being used.
- f) Public consultation meetings are also organised by the ULBs whenever required in such situations.

- g) Pollution Control measures are also taken in accordance with Environment Protection Laws.
- h) Various methods are being used by the ULBs to control the Odour nuisance at the sites by regular spraying Odour neutraliser.
- i) Regular watering process is carried out by the ULBs to prevent the occurrence of fire.
- j) Quality of air at these sites is monitored by the Maharashtra Pollution Control Board.
- k) Many ULBs have taken steps to segregate and process wet waste so as to minimize overall waste and to reuse by-products like Methane.

10. I say that as submitted above, the State is already seized with Solid Waste Management matter and efforts are being further intensified with the implementation of the Government of India's Swachh Bharat Mission, wherein, Municipal Solid Waste Management is one of the major components.

11. I say and submit that the State is already taking measures for effective management of Municipal Solid Waste. Efforts are being intensified for implementation of the Municipal Solid Waste Management (Management & Handling) Rules, 2000 in the right spirit. The various suggestions made by the CPCB in its Draft National Plan for Management of MSW, will also be considered while preparing the State / city based Action Plans. Intensified efforts & measures are also being taken up by the State for management of SWM through the Swachh Bharat Mission. In pursuant to the directives of this Hon'ble Tribunal dated 20th March, 2015 the aforesaid is submitted for kind perusal.

DEPONENT

(Seema Dhamdhere)

Joint Secretary,

Urban Development Department

Place: Mumbai

Date: 18th April, 2015

VERIFICATION

I, Smt. Seema P. Dhamdhere, Age 57 years, Occupation, Govt. service at present working as Joint Secretary, Urban Development Department, Mantralaya, Mumbai, do hereby State on solemn affirmation that the contents of this affidavit are on the basis of the office record and information which I believed to be true and correct. Hence it is verified on this day of the 18th April, 2015 at Mumbai.

under Oaths Act, 1969

Points considered while preparing the clusters for the Municipal Solid Waste Management projects for the state of Maharashtra

- 1) Distance to transport the waste should not be more than 40 km.
- 2) Distance are mapped based on www.maps.google.com and the same has not been verified for accuracy.
- 3) Waste generation @ 400 grams per day per person
- 4) Census 2011 Population is considered assessment of waste quantity.
- 5) These clusters are based on distances and quantum of aggregated waste, however the project feasibility (technical + Financial) may be required.
- 6) Cities where facilities are already development are also covered in this cluster identification.

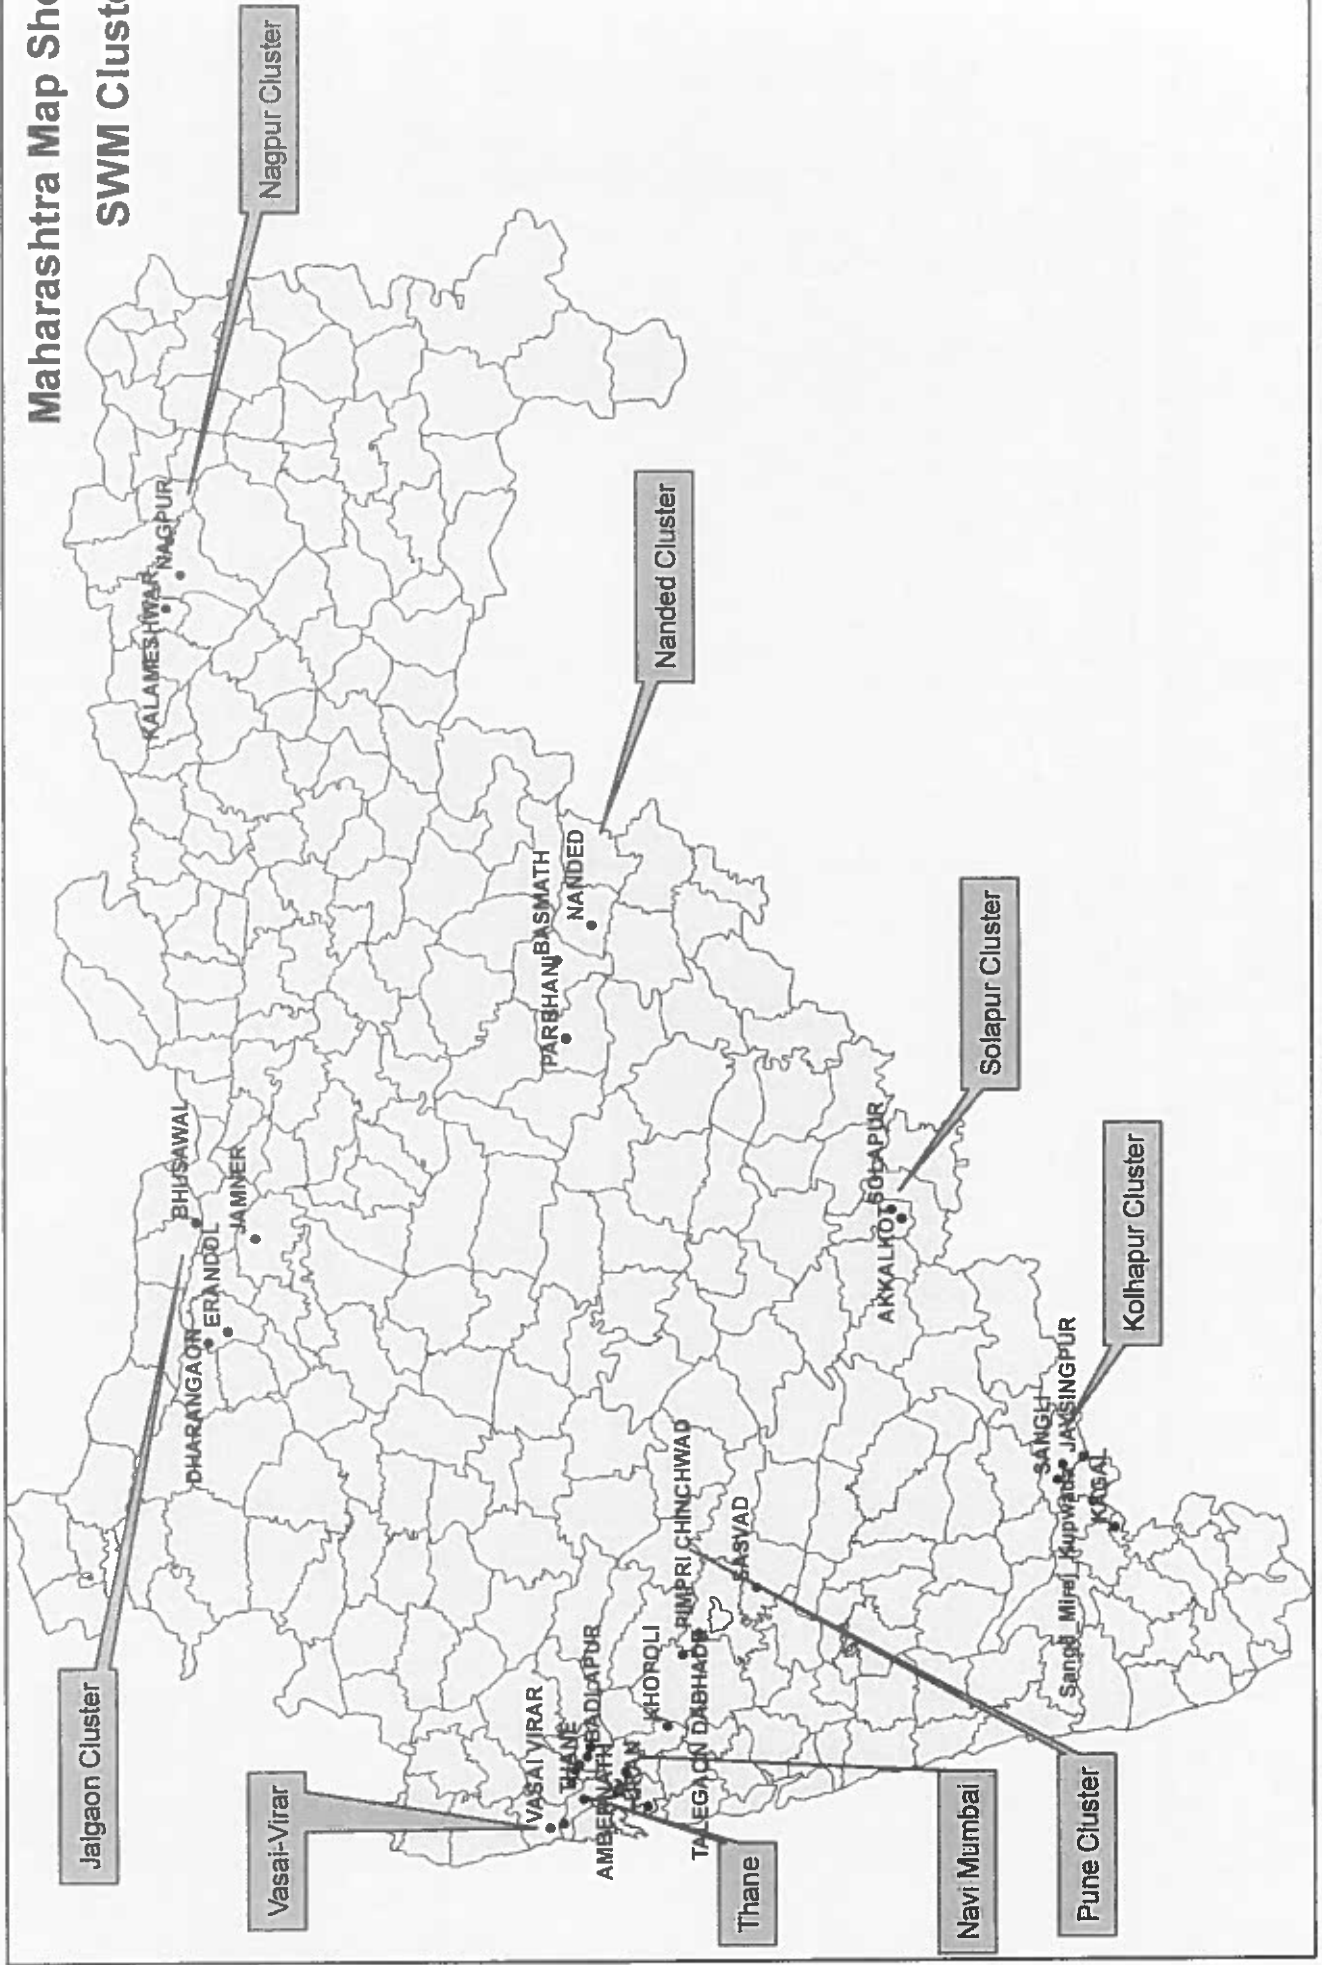

Draft Municipal Solid Waste Management Project Clusters

Cluster Number	Cities in culester	Population (Census 2011 in lakhs)	Approximate MSW @ 400 grams/ day (TPD)	Distance between major cities (in km)
